 [Portafolio](#)

## PROFILE

Engineer focused on DevSecOps, SecOps, and Infrastructure, with experience in operational security. Linux server administration, access management, perimeter security, and deployment automation through Ci/CD. I have worked with GitHub Actions, SSH, Firewall, SELinux, access audits, and vulnerability analysis, contributing to the protection and maintenance of corporate applications and infrastructure.

I also have a strong foundation in **Full Stack** development, using technologies such as Python, React, Angular, Flutte, Django, FostAPI, AdonisJS, and PHP, which allows me to understand security from the architecture and construction of applications. I am known for my analytical thinking, fast learning, project leadership, and ability to collaborate with technical and business teams, with a focus on building secure, scalable, and efficient solutions.

## RELEVANT EXPERIENCE

### FULL STACK & SECOPS ENGINEER

(Gebesa) Dec. 2025 – Aug. 2026

- Managed critical access and credentials, administering high and low SSH keys and API Keys, as well as performing audit scripts to detect anomalies.
- Executed **application security controls**, including code review and vulnerability analysis on dependencies.
- Designed and administered **firewall and perimeter security policies**, applying access rules, denial by default, and SELinux policies.
- Designed and maintained **Ci/CD pipelines with GitHub Actions**, ensuring controlled, traceable, and consistent deployments in corporate environments.

### FULL STACK DEVELOPER

(Gebesa) Apr. 2025 – Dec. 2025

- Developed Full Stack solutions with **Python** and **React**, including AI assistants for **lead management** and **commercial customer support**.
- Implemented **Artificial Intelligence** features in mobile applications developed with **Flutter and Python** backend.
- Automated **prospecting** processes using **Python** assistants, integrating administrative interfaces in **React**.
- Developed business modules with **Python, React**, and **3D visualization** to enhance user experience on iOS and Android devices.

### FULL STACK DEVELOPER

(PowerTech de México) Sep. 2024 – Apr. 2025

- Developed an **Angular II** sales platform, optimizing the quoting process and reducing lead generation time by **40%**.
- Implemented a **Python** monitoring system with Modbus protocol, enabling **real-time visualization** of daily production and supporting data-driven decision-making.
- Led the **modernization** of an enterprise PHP 8.2 application, applying refactoring, version control with **GitHub**, and strengthening security through authentication and data validation.

## EDUCATION

### ENGINEERING DEGREE IN SOFTWARE DEVELOPMENT AND MANAGEMENT

Universidad Tecnológica de  
Torreón

### ASSOCIATE DEGREE IN CROSS-PLATFORM SOFTWARE DEVELOPMENT

Universidad Tecnológica de  
Torreón

## SKILLS

DevSecops | SecOps | Linux Administration | Ci/CD | GitHub Actions | Cloud Infrastructure | AWS | Oracle Cloud | DigitalOcean | Nginx | SELinux | Firewall | UFW | Wireguard | SSH | Vulnerability Analysis | Python | Bash Scripting | React | Angular | Django | FastAPI | MySQL | PostgreSQL | MongoDB | Git | Git Flow | API Integration | Automation | Leadership | Analytical Thinking | Problem-Solving | Communication
